

UCP Compliance Audit Report

Universal Content Protocol Technical Assessment

REVIEW DATE

03 February 2026 at 03:44:27 UTC

SITE REVIEWED

<https://risosu.com>

EXECUTIVE SUMMARY

0/100

NOT READY

× NON-COMPLIANT

UCP Readiness Assessment: This website does not meet the minimum requirements for UCP deployment. Significant technical implementation is needed across multiple components.

Detailed Component Analysis

✖ Robots.txt UCP directive

0/20

No UCP directive in robots.txt

Assessment: Presence of UCP references in robots.txt. Endpoint: <https://risosu.com/robots.txt>; Status: 200

Weight in calculation: 20%

RECOMMENDED ACTION

Add UCP directive to your robots.txt file at <https://risosu.com/robots.txt>

```
User-agent: *  
Allow: /.well-known/ucp  
  
# UCP Configuration  
UCP-Config: /.well-known/ucp
```

This allows AI agents and crawlers to discover your UCP configuration endpoint.

✗ UCP configuration file

0/50

UCP config found but invalid (JSON validation error)

Assessment: Accessibility and format of /.well-known/ucp. Endpoint: <https://risosu.com/.well-known/ucp>; Status: 200; JSON: invalid/unknown

Weight in calculation: 50%

⚡ RECOMMENDED ACTION

Create UCP configuration file at <https://risosu.com/.well-known/ucp>

```
{  
  "version": "1.0",  
  "publisher": "risosu.com",  
  "contact": "admin@risosu.com",  
  "content_types": ["text", "html"],  
  "ai_training": "opt-out"  
}
```

Ensure this file returns JSON with `Content-Type: application/json` header.

✗ UCP HTTP headers

0/30

No UCP-related headers detected

Assessment: Presence of UCP-related headers in HTTP response. Endpoint: <https://risosu.com/>; Status: 200

Weight in calculation: 30%

⚡ RECOMMENDED ACTION

Add UCP-related HTTP headers to your homepage response:

```
UCP-Config: /.well-known/ucp
X-Robots-Tag: UCP-Enabled
```

Configure your web server (Apache, Nginx, Cloudflare) to send these headers with all page responses.

Scoring Methodology

Weighted Average Calculation

- **Robots.txt UCP Directive (20%):** Presence of UCP references in robots.txt
- **UCP Configuration File (50%):** Accessibility and format of /.well-known/ucp
- **HTTP Headers (30%):** Presence of UCP-related headers in HTTP response

Compliance Thresholds: Compliant (≥ 70), Partial (50-69), Non-Compliant (< 50)

PRIVACY & DATA PROTECTION NOTICE

GDPR alignment: This automated technical assessment is designed to follow data minimization and purpose limitation principles.

No data storage: The service is intended to run with zero data retention (in-memory processing only) and does not store site content or results after the PDF is generated.

Automated processing: The scan is fully automated and checks only publicly accessible endpoints (robots.txt, /.well-known/ucp, HTTP headers).

Informational use: This report is provided for informational purposes and should be complemented with your own validation.

Cross-border note: This assessment is executed from the Netherlands (EU) while reviewing websites hosted in other jurisdictions. The scan is limited to public technical endpoints and performed in a compliance-oriented manner.

Reviewer location: Netherlands (EU)
