TARGET HOST  
ergodebooks.com

PROTOCOL VER  
v1.0

## TECHNICAL BREAKDOWN

### Robots.txt UCP directive

No UCP directive in robots.txt

0 / 20 pts

**Endpoint Analysis:** Presence of UCP references in robots.txt. Endpoint: <https://ergodebooks.com/robots.txt>; Status: 200

#### ⚡ ACTION REQUIRED

Add the following UCP directive to <https://ergodebooks.com/robots.txt>:

```
User-agent: *
Allow: /.well-known/ucp
UCP-Config: /.well-known/ucp
```

### UCP configuration file

UCP config found (valid JSON)

50 / 50 pts

**Endpoint Analysis:** Accessibility and format of /.well-known/ucp. Endpoint: <https://ergodebooks.com/.well-known/ucp>; Status: 200; JSON: valid

### UCP HTTP headers

No UCP-related headers detected

0 / 30 pts

**Endpoint Analysis:** Presence of UCP-related headers in HTTP response. Endpoint: <https://ergodebooks.com>; Status: 200

 **ACTION REQUIRED**

Configure your server to send these headers on the homepage:

```
UCP-Config: /.well-known/ucp  
X-Robots-Tag: UCP-Enabled
```

#### PRIVACY & DATA PROTECTION NOTICE

GDPR alignment: This automated technical assessment is designed to follow data minimization and purpose limitation principles.

No data storage: The service is intended to run with zero data retention (in-memory processing only) and does not store site content or results after the PDF is generated.

Automated processing: The scan is fully automated and checks only publicly accessible endpoints (robots.txt, /.well-known/ucp, HTTP headers).

Informational use: This report is provided for informational purposes and should be complemented with your own validation.

Cross-border note: This assessment is executed from the Netherlands (EU) while reviewing websites hosted in other jurisdictions. The scan is limited to public technical endpoints and performed in a compliance-oriented manner.
